### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims teach a pouch type secondary battery comprising an electrode assembly having positive and negative electrode plates with a separator inbetween, and terminals extending from the plates; a pouch casing having a space in which the electrode assembly is housed, wherein the space has a seal portion at the periphery and at least one of the terminals is exposed to the seal portion; and at least one opening member disposed at a position of the seal portion and made of a resin material having a lower melting point than the seal portion of the pouch casing, wherein a thickness of the opening member in a direction perpendicular to the seal portion is less than a half of a width of the seal portion in the same direction at the position of the seal portion where the opening member is disposed.

In the prior art of record, Takahashi et al., U.S. Pat. No. 6,653,018 B2, teach a pouch type secondary battery comprising an electrode assembly having positive and negative electrode plates with a separator inbetween, and terminals extending from the plates; a pouch casing having a space in which the electrode assembly is housed, wherein the space has a seal portion at the periphery and at least one of the terminals is exposed to the seal portion; and at least one opening member disposed at the seal portion and made of a resin material.

However, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a thickness of the opening member in a direction perpendicular to the seal portion is less than a half of a width of the seal portion in the
